

Venkata Ravindra Siddavatam

Java Developer

Cape Girardeau, MO | +1 (573) 587 4192 | vr.siddavatam@gmail.com | [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

SUMMARY

- Java Developer with 5+ years of hands-on experience designing, developing, and maintaining scalable, secure, and high-performance server-side applications.
- Expertise in Java, Spring, Hibernate, JPA, and Microservices architecture to deliver modular and robust enterprise solutions.
- Adept in developing APIs using RESTful services and integrating backend systems with seamless data exchange using Servlets, JSP, JSTL, JDBC, and JavaBeans.
- Skilled in SQL, and databases using PostgreSQL, Oracle, MySQL, etc., to handle complex queries and ensure data consistency.
- Experience with Agile, SDLC, and Waterfall methodologies to streamline development cycles and improve delivery timelines.
- Expert in CI/CD automation, version control, and testing using Git, GitHub, Maven, Jenkins, Jira, etc., to ensure efficient delivery and team collaboration.
- Strong understanding of HTML, CSS, JavaScript, TypeScript, Bootstrap, jQuery, Ajax, JSON, and XML for full-stack integration.

SKILLS

Methodologies: SDLC, Agile, Waterfall

Languages: Java, Python, SQL, PL/SQL, C, C#, C++

Frameworks: Spring (MVC, Boot, Security), Microservices, JPA, JSF, Hibernate, Node.JS

IDEs: NetBeans, IntelliJ IDEA, Visual Studio Code, Eclipse

J2EE Technologies: Servlets, JSP, JSTL, JavaBeans, JDBC, Java Mail

Web Technologies: HTML, CSS, JavaScript, TypeScript,

Bootstrap, jQuery, Ajax, JSON, XML

Cloud Tool/Application Server: AWS (VPC, EC2, S3, CloudFront, ELB), Azure, Apache Tomcat, IBM Web Sphere

Databases: MySQL, SQL Server, PostgreSQL, Oracle, MongoDB

Version Control/Other Tools: Git, GitHub, GitLab, Maven, Gradle, Jira, Jenkins, Junit, MS Excel, JMeter

Operating Systems: Windows, Linux, Mac

EDUCATION

Master of Science in Computer Science

May 2025

Southeast Missouri State University, Cape Girardeau, MO

Bachelor's in Computer Science and Engineering

Jun 2018

RGM College of Engineering and Technology, Nandyal, India

EXPERIENCE

Morgan Stanley

Aug 2024 - Present

Java Developer

USA

- Industrialized scalable enterprise applications using Java, Spring, Microservices, JavaBeans, and JDBC, reducing database latency by 25% and enhancing system modularity.
- Designed RESTful APIs and integrated with PostgreSQL and Oracle databases, optimizing data transactions and ensuring high availability and consistency.
- Created receptive user interfaces using HTML, CSS, and JavaScript, improving cross-browser compatibility and user engagement.
- Deployed and managed applications on AWS and Apache Tomcat, improving system uptime and reducing infrastructure costs by 20% through cloud optimization.
- Operated Agile methodologies and collaborated with cross-functional teams to ensure iterative development, timely delivery, and alignment with business goals.
- Optimized development workflows using Jenkins, and Jira, boosting deployment efficiency and improving sprint velocity.

Groovy Web

Nov 2018 - Jul 2023

Java Developer

India

- Developed and deployed robust back-end systems using Java, JPA, and Hibernate, optimizing performance and ensuring seamless integration with relational and NoSQL databases like MongoDB.
- Engineered RESTful services with Node.js and Java Servlets to streamline data processing and support scalable microservices architectures.
- Designed and maintained dynamic web components using JSP, JSON, XML, and integrated TypeScript with Bootstrap, jQuery, and Ajax for enhanced client-side performance.
- Executed CI/CD workflows using Maven and Azure DevOps, improving deployment efficiency and reducing release cycle times.
- Conducted thorough unit and integration testing using JUnit and JMeter, increasing code quality and decreasing post-deployment defects by 40%.
- Migrated legacy systems to modern architectures on Azure, enhancing application availability and reducing infrastructure costs.
- Developed and maintained enterprise-grade web applications using Servlets, JSP, and JSTL, enabling dynamic content rendering and seamless user interactions.
- Integrated Java Mail API to automate email notifications, enhancing communication workflows across internal and customer-facing applications.
- Deployed applications on IBM WebSphere Application Server, improving reliability, and enterprise-level scalability.
