EDUCATION

Southeast Missouri State University, St.Louis, MO

May 2025

Master of Science in Computer Science

GPA 3.87

Graduate Teaching Assistant | Awarded Graduate Merit Scholarship.

RGM College of Engineering and Technology, Nandyal, India

Jun 2018

Bachelor's in Computer Science and Engineering

GPA 3.1

TECHNICAL SKILLS

- **Languages/Frameworks:** Java, Spring Boot, Spring Cloud, Node.js, Type Script, Spring Security, Spring MVC
- **Web Development:** React.js, HTML, CSS, JavaScript, JSON, REST APIs
- **Databases:** SQL, PL/SQL, MySQL, MongoDB, DynamoDB, JDBC, Hibernate
- **Tools:** Selenium, Cypress, AWS (EC2, S3, RDS, CloudWatch), Docker, Kubernetes, Kafka, Postman, SonarQube
- **DevOps/CI-CD:** Jenkins, Prometheus, Grafana, Splunk, Autosys, Git, Maven

RELEVANT WORK EXPERIENCE

Software Developer (Java Developer) | Carelon Global Solutions, India

Nov 2021 - Aug 2023

- Engineered backend functionalities using Java, Spring Boot, and OOP principles, adhering to Agile methodologies.
- Designed 30+ Spring RESTful APIs to streamline and optimize data exchange processes.
- Enhanced security with OAuth2, JWT, and two-factor authentication (2FA), enhancing application security.
- Authored automated test cases following Test-Driven Development principles, raising code **coverage by 20%** using JUnit and Mockito tests.
- Analyzed and optimized code quality with SonarQube, **reducing complexity by 35%** and **duplication by 20%**.
- Enhanced caching mechanisms using Redis, enhancing application speed and reducing database load.
- Established monitoring for 40+ servers using Prometheus, Grafana, and Splunk, delivering real-time dashboards and log analytics.
- Identified and fixed 15+ critical and 50+ minor application bugs, achieving a 98% success rate in issue resolution.

Project Engineer (Software Engineer) | Wipro Ltd., India

Nov 2018 - Nov 2021

- Developed Java-based web applications with Spring MVC and Hibernate, delivering over 20 major applications for a leading multinational oil and gas company.
- Ensured system stability through rigorous UAT and production validations, **achieving a 15% improvement**.
- Built and executed automation scripts using Selenium and Java to validate the stability of existing functionalities after new feature integration, reducing manual testing efforts by 90%.
- Managed and scheduled complex batch jobs using AutoSys, ensuring seamless execution and monitoring.
- Orchestrated multi-stage Docker builds for Java Spring Boot applications, significantly reducing build times and ensuring a clean production environment.

TECHNICAL PROJECTS

Java Spring Boot Projects | {GIT}

- Implemented 3 Java Spring Boot CRUD operations, managing 100+ weekly database transactions.
- Automated email system via SMTP, handling 80+ emails weekly, boosting communication.
- Constructed modules for data conversion to PDF/Excel, serving 20+ users weekly, enhancing access.

Static Code Analysis with SonarQube | {GIT}

- Deployed SonarQube in Docker to perform static code analysis, enabling early bug detection and vulnerabilities, improving code quality.

ACHIEVEMENTS

- Awarded Star of the Month at Carelon for improving software reliability through advanced debugging techniques.
- Received two On-the-Spot Team Awards at Carelon for excellence in project deployments.
