SUMMARY:

- Full Stack Java Developer with 5+ years of experience building high-performance web applications and backend systems using Java, Spring Boot, Hibernate, and Microservices.
- Proficient in designing RESTful APIs, integrating frontend interfaces with React.js and Bootstrap, and optimizing databases using Hibernate and JPA.
- Skilled in containerized deployments with Docker and Kubernetes, and experienced in cloud-based development using AWS services like EC2, S3, and RDS.
- Hands-on with security and performance tuning through OAuth2, JWT, Redis caching, and monitoring tools such as Grafana, Prometheus, and Splunk.
- Well-versed in Agile practices, code versioning with Git, continuous integration via Jenkins, and API testing using Postman.
- Strong foundation in software design principles and practical experience in scalable system architecture, frontend-backend integration, and cross-team collaboration.

EDUCATION:

- Southeast Missouri State University – St. Louis, MO | Master of Science in Computer Science — May 2025 | GPA: 3.87 | Graduate Teaching Assistant | Graduate Merit Scholarship Awardee
- RGM College of Engineering and Technology – Nandyal, India | Bachelor of Technology in Computer Science and Engineering — June 2018

TECHNICAL SKILLS:

Languages & Frameworks: Java 8/11, Spring Boot, Spring MVC, Spring Cloud, Spring Security, Hibernate, JSP, JPA, Node.js

Frontend: React.js, Bootstrap, JavaScript (ES6), HTML, CSS, AJAX, JSON, XML

Databases: MySQL, MongoDB, DynamoDB, Oracle, JDBC, PL/SQL

DevOps & Tools: Docker, Kubernetes, Jenkins, Maven, Git, SonarQube, AutoSys

Monitoring/Testing: Prometheus, Grafana, Splunk, JUnit, Mockito, Selenium, Postman, REST Assured

Cloud Platforms: AWS (EC2, S3, RDS, CloudWatch, IAM), Azure

IDE/Utilities: IntelliJ IDEA, Eclipse, Apache Tomcat, Trello

WORK EXPERIENCE:

Software Developer (Java Developer)

Carelon Global Solutions, India | Nov 2021 – Aug 2023

- Contributed to the design and implementation of microservices-based backend architecture using Spring Boot and Spring Cloud, supporting core healthcare operations.
- Built and consumed REST APIs for integrating third-party services and internal modules, enhancing system connectivity and performance.
- Managed application-level security using OAuth2 and JWT protocols while implementing role-based access control.
- Wrote and maintained automated test suites using JUnit and Mockito, ensuring code quality and reducing defects.
- Applied Hibernate for efficient data access with MySQL and optimized ORM mapping across service layers.
- Leveraged Redis to implement caching strategies for frequently accessed resources, improving application throughput.
- Integrated Prometheus and Grafana for system performance dashboards and used Splunk for log monitoring and alerts.

- Regularly participated in Agile ceremonies and contributed to sprint planning, backlog grooming, and retrospectives.

Environment: Java, Spring Boot, Spring Cloud, Hibernate, Microservices, REST APIs, Redis, OAuth2, JWT, Docker, Kubernetes, JUnit, Mockito, Prometheus, Grafana, Splunk, Git, Maven, AWS, SonarQube, IntelliJ, Apache Tomcat, JSON, XML, REST Assured, JSP, Servlet.

Project Engineer (Software Engineer)

Nov 2018 – Nov 2021

Wipro Ltd.

India

- Java 8, Spring Boot, Spring Security, Hibernate, REST APIs, Microservices, HTML5, CSS3, Bootstrap, JavaScript (ES6), Vue.js, MySQL, Git, Docker, AWS EC2, Postman, Linux
- Developed multiple enterprise applications using Java, Spring MVC, and Hibernate for an oil and gas client, focusing on backend logic and database integration.
- Created and styled dynamic web interfaces using Bootstrap, HTML, CSS, and JavaScript to ensure a responsive UI across devices.
- Worked with Hibernate ORM to optimize queries and ensure consistent database transactions across modules.
- Automated repetitive UI testing workflows using Selenium WebDriver integrated with test plans.
- Supported the setup and monitoring of daily batch job execution using AutoSys to handle business data operations.
- Packaged applications using Docker and participated in release cycles and staging deployments.
- Collaborated with QA and stakeholders for requirement gathering, clarifications, and delivery support.
- Adhered to Agile workflow, participating in sprints and updating project progress on task boards.

Environment: Java, Spring MVC, Hibernate, Bootstrap, HTML, CSS, JavaScript, Selenium, AutoSys, Docker, Jenkins, Git, Maven, MySQL, JSP, Apache Tomcat, IntelliJ, Servlet, JUnit, JSON.

Java Developer Intern

Mar 2018 – Nov 2018

NetPixel Software Solutions,

Hyderabad, India

- Participated in the development of internal modules for an in-house web application using Java and Spring MVC.
- Created basic REST APIs and assisted in backend logic for user and data management features.
- Contributed to front-end layout and style using Bootstrap and JavaScript for interactive design components.
- Wrote unit test cases using JUnit and collaborated with developers during testing and deployment cycles.
- Shadowed senior developers during Agile sprints, learning standard development practices and version control.

Environment: Java, Spring MVC, Bootstrap, HTML, CSS, JavaScript, JUnit, MySQL, Git, Eclipse, JSP, Apache Tomcat, Servlet.

TECHNICAL PROJECTS:

Java Spring Boot Projects

- Developed CRUD-based applications managing inventory and order systems, connected to relational databases using Spring Data JPA.
- Built SMTP-based email notification services for login, signup, and transaction events.
- Added functionality for PDF and Excel export of transactional records to support reporting needs.

Static Code Analysis with SonarQube

- Set up SonarQube within Docker containers and configured Maven plugins to enforce code quality during build and deploy cycles.

ACHIEVEMENTS:

- Recognized as "Star of the Month" at Carelon for enhancing platform performance and delivery efficiency.
- Received two "On-the-Spot" team awards for meeting tight deadlines and successful production deployments.
